## Summary

Frontend engineer focused on building responsive interfaces with React and TypeScript. Comfortable with Git and component testing. Exposure to backend APIs, but primary experience in UI.

## Skills

React • TypeScript/JavaScript • Git • CSS/HTML • Jest/RTL • Vite/Webpack • Node (tooling)

## Experience

Frontend Engineer | BrightDash | 2023–Present

- Built modular React components (tables, forms, charts) with strong accessibility and unit tests (Jest/RTL).
- Implemented form validation and client-side state (Redux Toolkit); collaborated via Figma.
- Integrated REST endpoints; added error boundaries and loading skeletons.

Frontend Intern | EduLabs | 2022–2023

- Converted legacy jQuery pages into React; reduced bundle size by 28% with code splitting.

## Projects

Admin Dashboard (React, TS): Role-based UI; reusable form primitives; storybook docs for components.

## Education

B.S. Information Science, UC San Diego, 2023
